Likely Routes of Exposure: Eyes, skin, inhalation and ingestion

Most Important Symptoms And Effects, Both Acute And Delayed:

May cause serious eye damage, may irritate skin; may irritate airways with overexposure; possible results producing headache, blurring of vision, dizziness and other effects on specific organs or body areas as listed below. Harmful if swallowed and enters airways; ingestion would likely cause digestive tract irritation.

Acute Health Hazard Symptoms:

Eyes: May cause irritation, stinging, tearing, blurry vision, redness, swelling, discomfort.

Skin: May cause irritation, burning, blurry vision, defatting which may lead to dermatitis, flaking, softening, redness, discomfort; other possible effects, if passage of material through skin, are listed next.

Ingestion and Inhalation: Irritation of digestive tract and intestinal disturbances, nausea, diarrhea. May cause irritation (nose, throat, airways), vomiting, central nervous system (CNS) depression, apparent intoxication, blurry vision, fatigue, coughing, headache, dizziness, discomfort, weakness, drowsiness, unconsciousness.

Acute Health Hazards: Skin, eyes and respiratory irritant; CNS depressant.

Chronic Health Hazards: One or more components have shown liver effects based on animal test data.

SECTION 5: FIRE-FIGHTING MEASURES

Engineering Controls: As required to provide normal air flow.
Ventilation: Local exhaust is recommended.
Respiratory Protection: Under normal use conditions a respirator should not be necessary, subject to local plant regulations; however, under conditions of excessive airborne concentrations, a NIOSH-approved respirator for organic vapors is recommended.
Eye Protection: Safety glasses or splash-proof goggles or face shield recommended.
Skin Protection: Chemical resistant gloves; latex or neoprene recommended.
Other Protective Gear: Proper apparel to prevent unnecessary exposure to personnel.
